## **MEDIA RELEASE**

### **Bore Maintenance Works – Smith Park (Bore 3)**

Coonamble Shire Council would like to advise the community that maintenance works are currently underway at Bore 3, located opposite the Coonamble Information and Exhibition Centre at Smith Park, due to an electrical issue.

To investigate further, crews are lifting the bore today.

As a result of these works, residents may notice water flowing to the kerb, gutter, and surrounding areas near Smith Park.

Council would like to reassure the community that:

- This is expected and controlled as part of the repair process
- There is no cause for concern if water is seen in the area
- Crews are actively working to identify and resolve the issue as quickly as possible

Council appreciates the community's understanding while these essential works are carried out. For further information, please contact Council on (02) 6827 1900.
