

Attachment A – Site Layout Plans (Indicative)

Coonamble Shire Council

Purpose

This attachment provides **indicative site layout plans** to assist Respondents in understanding the approximate extent and location of the proposed fencing and bollard installation works.

The layouts are indicative only and are to be used for pricing and planning purposes. Final locations are to be confirmed onsite with Council prior to installation and at the relevant hold points.

Figure 1 – Indicative Fence Layout

The fence layout illustrates the **approximate alignment and extent of the proposed new steel fence** along the nominated boundary of the Coonamble Dry Ground site.

- Fence is to be installed generally in the location shown.
- Finished fence height to be **900 mm above finished path level**.
- Fence panels and posts are **supplied by Council**.
- Final alignment and fixing methodology are subject to confirmation at **Hold Point HP1**.

(Refer to Image below: “260123 Approx Fence Line”)

Figure 2 – Indicative Bollard Layout

The bollard layout illustrates the **approximate location of proposed bollards** along the nominated edge of the site.

- Bollards are to be installed at **approximately 2.0 metre centres**.
- Bollards are **supplied by Council**.
- Installation requirements:

- 300 mm embedment below ground
- 750 mm exposed height above ground
- Final bollard spacing and locations are subject to onsite confirmation with Council prior to installation and at **Hold Point HP1**.

(Refer to Image below: “260123 Approx Bollard Placement”)

General Notes

- Respondents must allow for all setting out, verification of dimensions, and coordination with Council.
 - The Contractor is responsible for confirming underground services via **Dial Before You Dig (DBYD)** prior to any excavation works.
 - The indicative layouts do not reduce the Respondent’s obligation to comply with **Fencing & Bollard Installation Specifications** and **Scope of Requirements**.
